# Consulting Insights

Technology consulting is the process of providing professional technology advice to a business or organization.

01

Business process management is a systematic approach to improving those processes that an organization is unable to perform internally due to cost or resources.

02

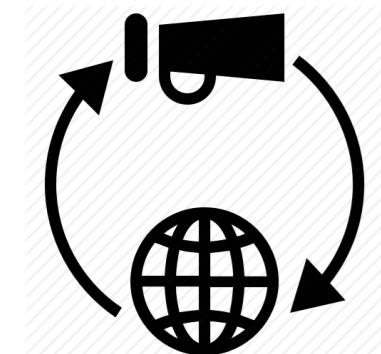

When a business is troubled, organizational development consultants, sometimes called industrial organizational psychologists, are brought in to research and analyze corporate environments through observing and interviewing management.

03

A business strategy in which growth is obtained by increasing the number of stores in which customers can buy a company products and services.

04

Digital marketing benefits businesses of all sizes by giving access to the mass market at an affordable price. The main advantage of digital marketing is that a **targeted** audience can be reached in a **cost-effective** and measurable way

05

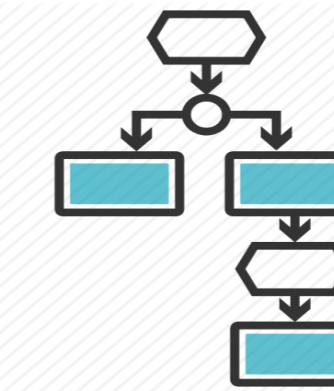

IT project management optimizes the process as technology has both tangible and intangible benefits that helps to make money and produce the results that customers demand.
